2005 Fall

Wireless & Multimedia Network Laboratory™

CSE

First Week Agenda

- ♦ Course Preview
- ♦ Wireless Multimedia/Mobile Computing / Pervasive Computing
- ♦ Wireless Mobile Communications
- ♦ System Review and Fundamental Problems
- ♦ Next Week

Wireless & Multimedia Network Laboratory™

Wireless
Multimedia

Course Preview

What is Going to Happen in the Course?

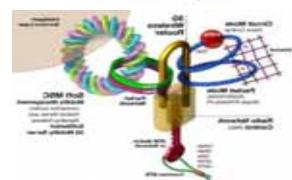

Wireless & Multimedia Network Laboratory™

Wireless
Multimedia

CSE

Course Contents

- ♦ Fundamental Wireless Technology
 - Propagation Model
 - Wireless Medium Access
 - Transport Solutions
 - Ad hoc Wireless System
 - Cellular System
 - Middleware Systems
 - Multimedia System
- ♦ Advanced Wireless Technology
 - Multicasting
 - Heterogeneous System
 - Routing Algorithms
 - QoS/ Reliable Transmissions

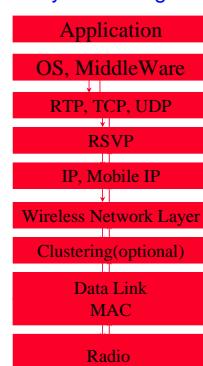

Wireless & Multimedia Network Laboratory™

Wireless
Multimedia

Roaming Across a variety of heterogeneous network and service environments

CSE

Adaptive
Algorithm
by QoS
Requirement

Mobility
Unpredictable
channel
by QoS
Information

Wireless & Multimedia Network Laboratory™

Wireless
Multimedia

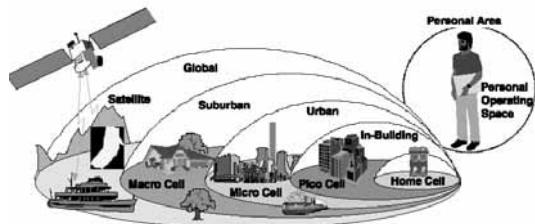

New Interests

- ♦ Provision of Sufficient Transmission Capacity for Broadband Mobile Multimedia: A Step Toward 4G
- ♦ Future Broadband Radio Access Systems for Integrated Services with Flexible Resource Management
- ♦ QoS Support for an All-IP system Beyond 3G
- ♦ Enhancing IP Service Provision over Heterogeneous Wireless Network
- ♦ Re-configurable Terminals: An Overview of Architectural Solutions

Wireless & Multimedia Network Laboratory™

Wireless
Multimedia

Ubiquitous Services

Wireless & Multimedia Network Laboratory™

CSE

Adaptive Applications

Wireless & Multimedia Network Laboratory™

Wireless & Multimedia Network Laboratory™

Expectation of the Class

- Basic Understanding of PCS world
- Being able to do the wireless research
- Developing the capability to invent the key wireless applications

Wireless & Multimedia Network Laboratory™

Wireless & Multimedia Network Laboratory™

CSE

Aeronautical Communications

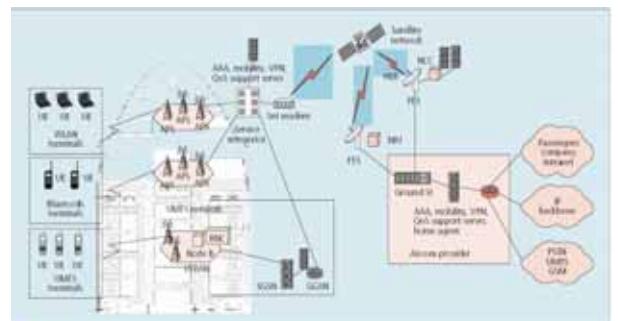

Figure 2. Aeronautical communications network architecture.

Wireless & Multimedia Network Laboratory™

Wireless & Multimedia Network Laboratory™

Ultra-Wideband Radio

Wireless & Multimedia Network Laboratory™

CSE

Course Process

- ♦ Paper reading and your presentations
- ♦ Wireless Multimedia Applications Exercises

Mobile Computing

Wireless & Multimedia Network Laboratory™

CSE

Mobile phone today =
multipurpose terminal for ...

Wireless & Multimedia Network Laboratory™

Wireless & Multimedia Network Laboratory™

Reading list for This Lecture

- ♦ Required Reading:
 - (Cfox95) D. Cox, "Wireless Personal Communications: What is it?", IEEE Personal Communication Magazine, (April 1995) pp.20-35
 - (S2001) M. Satyanarayanan, "Pervasive Computing: Vision and Challenges", IEEE Personal Communication Magazine, (August 2001), pp.10-17
 - (Bi2001) Qi Bi, George I. Zysman, and Hank Menkes, "Wireless Mobile Communications at the Start of the 21 Century", IEEE Communication Magazine (January 2001), pp. 110-116

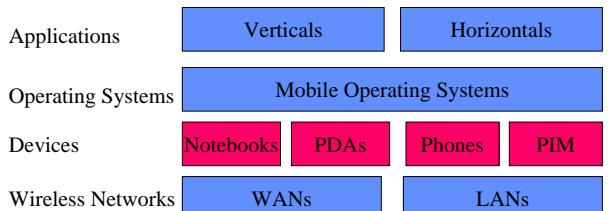

Further Reading

- (Bolcskei2001) H. Bolcskei, A. J. Paulraj, K. V. S. Hari, and R. U. Nabar, "Fixed Broadband Wireless Access: State of the Art, Challenges, and Future Directions", IEEE Communication Magazine

Wireless & Multimedia Network Laboratory™

Wireless & Multimedia Network Laboratory™

Mobile Computing

Wireless & Multimedia Network Laboratory™

Wireless & Multimedia Network Laboratory™

Mobile Computing

CSE

- ♦ information processing in general
 - not just communication or just computing, but both
- ♦ Any medium or combination of medium
 - process not just telephone voice or just data, but multimedia
- ♦ Mobility
 - components of the systems may be
 - ♦ moving, tether-less (wireless), portable
 - uses of the system may be moving

Wireless & Multimedia Network Laboratory™

Why should we care ?

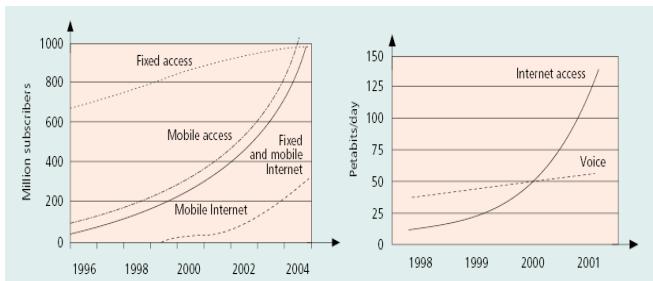

CSE

- ♦ Reason # 1 : \$\$\$ & jobs
- ♦ Explosive growth of wireless voice, paging, and data services
 - 35-60 percent annual growth in the past decade
 - mobile phones in US will be 42 % of fixed -line phones by 2000
 - 700 million mobile users at the end of 2000
 - One billion expected by 2003
- ♦ Big demand for portable communicators and computers
 - 2 M portable computer in 1988 to 74.1 M units in 1998

Wireless & Multimedia Network Laboratory™

Growth in traffic in different access system and voice and data services CSE

Wireless & Multimedia Network Laboratory™

Is there a more “academic” reason ?

CSE

- ♦ Reason # 2: a next step in the evolution of information system
- ♦ Evolution from personal computing to networked computing to mobile computing
- ♦ Evolution from wired telephony to cordless telephony to mobile cellular telephony
- ♦ At the same time, unification of computing and communication

Wireless & Multimedia Network Laboratory™

Mobile Multimedia Systems

CSE

- ♦ Ubiquitous information access (everybody else)
 - e.g. wireless computing, mobile computing, nomadic computing
 - information distributed everywhere by “the net”
 - users carry (wireless) terminals to access the information services
 - terminal is the universal service access device
 - terminals adapt to location and services
 - Knowledge-based society
- ♦ Flexible Users Choices
 - In terms of access, service, content
 - Any where, anytime, any terminal equipments
- ♦ Wearable Computing terminal / Mobile Broadband services (MBS)

Wireless & Multimedia Network Laboratory™

Pervasive Computing

CSE

- ♦ Technology that disappears
 - The most profound technologies are those that disappear. They weave themselves into the fabric of everyday life until they are indistinguishable from it.
- ♦ Ubiquitous (Invisible) Computing (Xerox PARC)
 - Cheap computers of different scale and types embedded everywhere
 - Potentially 100s of computers per room that disappear into background (e.g. active badge, tabs, pads, live boards..)
 - User centric, not terminal centric
 - Computers swapped and shared among users
- ♦ Effective Use of Smart Spaces
- ♦ Invisibility
- ♦ Localized Scalability
- ♦ Masking Uneven Conditioning

Wireless & Multimedia Network Laboratory™

Support for Pervasive Computing

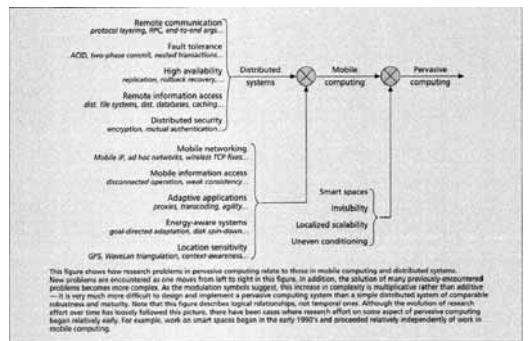

- ♦ User Intent
- ♦ Cyber Foraging
- ♦ Adaptation Strategy
- ♦ High-Level Energy Management
- ♦ Balancing Pro-activity and Transparency
- ♦ Privacy and Trust
- ♦ Impact on Layering

Wireless Communications

Mobile Communications

Fixed Broadband Wireless Communications

Evolution of Mobile Wireless Systems

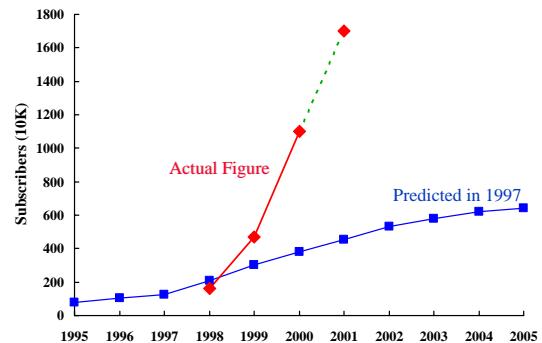

- ♦ First Generation : Analog – Voice
 - Analog modulation
 - Cellular phone (AMPS) with manual roaming
 - Cordless phones
 - Packet radio networks
- ♦ Second Generation : Digital - Voice & Data
 - WAP (wireless application protocol)
 - 2.5 G GPRS
 - Wireless data LANs (802.11), MANs (Metricom), WANs (CDPD, ARDIS, RAM)
- ♦ Third Generation: Digital – Multimedia
 - Unified digital wireless access anytime, anywhere
 - Voice, data, images, video, music, sensor etc.
- ♦ 4G~ Life after Third-Generation Mobile Communications

Cellular Service Subscription

Wireless Personal Communications

What is it?

- Cellular telephone
- Cordless telephone
- Paging systems
- Wide area data networks
- Local area data networks

Many ways to segment PCS

- Applications
- Extent of coverage
- Degree of mobility (speed, area)
- Circuit switched voice vs. packet-switched data
- Mode of communication (messaging, two-way real time, paging, agents)
- User location (indoor vs. outdoor, train, airplane)

Common ingredients in all PCS activity

- Desire for mobility in communications
- Desire to be free from tethers

QoS and Multimedia Traffic Support

What problem does Multimedia Bring?

System Configurations

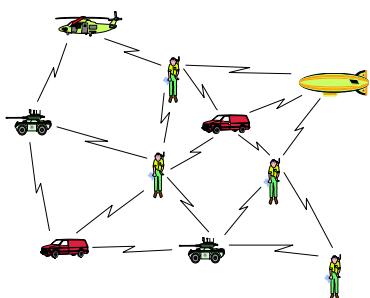

- ♦ Ad hoc ~ Multi-hop
 - Wireless LAN
 - Blue-tooth
 - Packet Radio
 - WAMIS
- ♦ Cellular ~ GSM, WAP, GPRS, 3G
- ♦ Satellite ~ LEO, GEO

Wireless & Multimedia Network Laboratory™

ATM network

Wireless & Multimedia Network Laboratory™

Wireless Multimedia

CSE

Typical Cellular Call

- Initialization (find your base-station)
- Service Request
 - Location Level : Paging
 - Channel Assignments
- Handoff

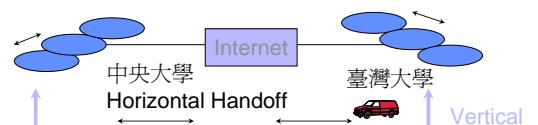

Wireless & Multimedia Network Laboratory™

CSE

Wireless Comm: Heterogeneity & Security

- Heterogeneous networks

Taipei Cellular

Wireless & Multimedia Network Laboratory™

Wireless & Multimedia Network Laboratory™

CSE

Limited & Variable Bandwidth

- Low bandwidth compared to wired
- Highly variable bandwidth
- High latency

Wireless & Multimedia Network Laboratory™

CSE

Wireless Communication

- More difficult than wired communication
- Dis-connections

Wireless & Multimedia Network Laboratory™

Wireless & Multimedia Network Laboratory™

CSE

Mobility

- Address migration
- Location-dependent information
- Migration locality

Wireless & Multimedia Network Laboratory™

CSE

Portability

- Light weight power
- Risks to data
- Small user interface
- Small storage capacity

Wireless & Multimedia Network Laboratory™

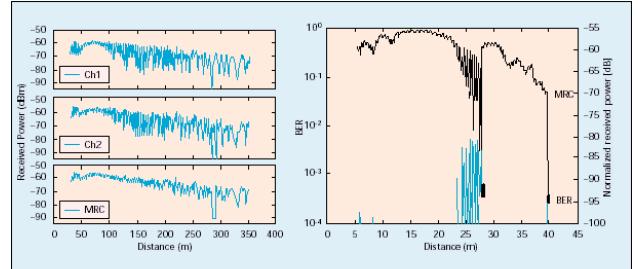

Wireless & Multimedia Network Laboratory™

CSE

Challenges in Mobile Multimedia Infor-CS-E System

- ♦ Portable end-points
- ♦ End-to-end Quality of Services
- ♦ Seamless operation under context (location) changes
- ♦ Context-aware operation
- ♦ Secure operation

Channel Propagation and Fading
